

INCIDENT MANAGEMENT SITUATION REPORT  
 THURSDAY, SEPTEMBER 16, 1999 - 0530 MDT  
 NATIONAL PREPAREDNESS LEVEL III

CURRENT SITUATION:

Initial attack activity increased in the Southern Area and was minimal elsewhere. Large fire activity continued in the Northern California, Southern California and Northwest Areas. The National Interagency Coordination Center mobilized helicopters, infrared aircraft, meteorological equipment, a commissary, a shower unit, radio equipment, and miscellaneous overhead. A tractor plow operator on a Mississippi State fire received second degree burns, was treated at the hospital and released. Mississippi State also reported that a tractor plow unit was overrun by a fire. Although the unit was destroyed, the operator was not injured. Very high to extreme fire indices were reported in Idaho, Utah, California, Montana, Washington, Oregon, Nevada, South Dakota, Georgia, Mississippi, Alabama, and Texas.

NORTHERN CALIFORNIA LARGE FIRES:

BIG BAR COMPLEX, Shasta-Trinity National Forest. The complex, which is 28 miles northwest of Weaverville, CA, will transition from a Type II Incident Management Team (Weltch) to a Type I Incident Management Team (Dubois) this morning. The complex consists of the Fawn, Soldier, Megram, and Onion fires. The Fawn fire continues to spread west of Jeep Ridge, but has remained south of Soldier creek. Crews are holding the southern and northwest portions of this fire. The Megram fire is burning actively to the south, backing downhill. Objectives are to keep this fire from crossing Virgin Creek. Active burning occurred in the interior of the Onion fire. Inversions continue to pose problems for air support.

STEIN, Klamath National Forest. This fire is in the Marble Mountain Wilderness Area, twelve miles northeast of Forks of the Salmon, CA. Crews worked to mop up 300 feet in from the fire's perimeter. Demobilization is underway.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTAL PERS	CRW	ENG	HELI	STRC LOSS	EST LOSS	\$\$\$ C-T-D
BIG BAR COMPLEX	CA	SHF	32181	55	UNK	899	25	38	9	0	NR	12.7M
STEIN	CA	KNF	876	95	9/16	318	3	0	3	0	NR	2.2M

SOUTHERN CALIFORNIA LARGE FIRES:

KIRK COMPLEX, Los Padres National Forest. A Type I Incident Management Team (Greenhoe) has assumed command of the Kirk Complex North, which includes the Tassajara, Five, and Mountain fires. A Type II Incident Management Team (Smith) is assigned to the Kirk Complex South, which includes the Hare and Kirk fires. This complex is in the Ventana Wilderness, approximately twenty miles southeast of Carmel, CA. The

Tassajara and Five fires expanded rapidly under northwest winds and are expected to burn together. The Mountain fire is a lightning holdover which grew significantly yesterday and is 0% contained. The Hare fire did not expand as quickly as the northern fires and may be contained within a few more days.

KIRK COMPLEX	CA	LPF	2700	10	UNK	1574	26	16	22	0	NR	5.9M

SOUTHERN AREA LARGE INCIDENTS:

HURRICANE FLOYD. A Type I Incident Management Team (Melton) will arrive in Sumter, SC today to manage a receiving and distribution center at Shaw Air Force Base. A Type II Incident Management Team (Ferguson) has set up a receiving and distribution center at Dobbins Air Force Base near Atlanta. The hurricane is expected to make landfall near Wilmington, NC this morning.

NORTHWEST LARGE FIRES:

MONTEITH ROCK, Willamette National Forest. A Type II Incident Management Team (Gardner) is assigned. This fire is four miles east of Oakridge, OR. Yesterday's burnout operation was successful and another burnout is planned for today. The estimated loss figure refers to high value old-growth timber.

OUTLOOK:

\*\*A FIRE WEATHER WATCH IS POSTED FOR THE WESTERN FLORIDA PANHANDLE FOR LOW HUMIDITY THIS AFTERNOON\*\*

High pressure will weaken over the Northwest today as a low pressure area moves east across southern Canada. Dry conditions will continue to dominate in Washington, Oregon, Idaho, Montana, and Wyoming.

A weak upper level low moving into Colorado will bring a chance of afternoon and evening showers and thunderstorms into eastern Nevada, Utah, Arizona, Colorado, and New Mexico.

California will remain dry with low humidities.

Southern Texas will be warm and dry as high pressure builds. Lingering

moisture across northern and western Texas will result in a slight chance of afternoon showers and thunderstorms.
